Invite You to a Smart Gardening Presentation

Smart Plant Choices

Invasives to Exotics to Native Plants Less water, less maintenance, more bird habitat...

A 45 minute Smart Garden presentation by Julie Serences

Learn how to make smart plant choices for your backyard garden -
become a "backyard habitat manager"!

English Ivy, Pampasgrass, some Brooms, Tree of Heaven... Did you know that these and other familiar plants pose a growing threat to native wildlife? **Invasives** are a **growing** problem –especially along our waterways. The increase of invasive and exotic plants have recently been linked to the decline of songbirds.

Learn more about these and other plants nurseries typically sell for the home gardens and how you can save \$\$\$\$ and help create urban backyard habitat.

Presentations will be given at the following locations:
